Aoraki hosts International Festival

The South Canterbury International Festival was held at Aoraki Polytechnic's Timaru Campus in October. The colour-ful festival featured headline acts and an array of cultural performances, villages, exhibitors, and a fashion show!

The event was a multicultural festival celebrating the cultural diversity that exists in South Canterbury as well as welcoming newcomers to the region. Running for the

second time, the annual South Canterbury International Festival included a variety of tastes, sights sounds and culture.

Aoraki Polytechnic worked in partnership with representatives from schools, business, the Aoraki Multicultural Council and other organisations to form an independent trust to organise the event and add to the cultural development of the South Canterbury region.
